About Company

FYNET GLOBAL is a venture of Nexus Fintrade. The company's mission is to provide people with new opportunities for online earning, referral income, and growth through digital platforms.

FYNET GLOBAL leverages cutting-edge technology and a global network, providing Indians with the opportunity to earn money and grow their businesses internationally.

Nexus Fintrade

Nexus Fintrade Limited is registered in Labuan, Malaysia, operating under a purported license from the Labuan Financial Services Authority (Labuan FSA) with license number MB/21/0065. The company provides trading in over 100 instruments, including currency pairs, equities, indices, precious metals, energy, and commodities via its proprietary trading platform and mobile app. Base currencies include AUD, EUR, GBP, and USD. The website indicates segregated client accounts are in place. Maximum leverage is stated as 1:100, with hedging and scalping allowed. The broker is not available to residents of the United States, Iran, Israel, and North Korea.

Third-party sources, including ForexPenguin, report a minimum deposit of USD 100 and confirm availability of demo accounts, support for Bank Cards and Bank Wires, and no compatibility with Expert Advisors (EAs). The available instruments include agriculture, commodities, cryptocurrencies, energies, indices, forex, metals, and stock CFDs. Leverage, base currencies, and trading restrictions align with previously confirmed details.

However, a review by ForexBrokerz states that there is no record of Nexus Fintrade in the Labuan FSA registry. It also raises concerns over opaque operational and trading terms, and the lack of evidence for true regulatory oversight or client safeguarding, despite claims of a license and segregated accounts. This conflicting information highlights regulatory uncertainty.

Who It's For

- Experienced traders seeking a proprietary LFX-style trading platform with mobile access and real-time market tools, supported by demo accounts.
- Clients comfortable trading using AUD, EUR, GBP, or USD with leverage up to 1:100, in markets allowing hedging and scalping.
- Traders able to deposit via bank cards or wire transfers and meet the minimum deposit threshold of USD 100.

What is Cryptocurrency?

Cryptocurrency is a digital payment system that doesn't rely on banks to verify transactions. It's a peer-to-peer system that can enable anyone anywhere to send and receive payments. Instead of being physical money carried around and exchanged in the real world, cryptocurrency payments exist purely as digital entries to an online database describing specific transactions. When you transfer cryptocurrency funds, the transactions are recorded in a public ledger. Cryptocurrency is stored in digital wallets. Cryptocurrency received its name because it uses encryption to verify transactions. This means advanced coding is involved in storing and transmitting cryptocurrency data between wallets and to public ledgers. The aim of encryption is to provide security and safety. The first cryptocurrency was Bitcoin, which was founded in 2009 and remains the best known today. Much of the interest in cryptocurrencies is to trade for profit, with speculators at times driving prices skyward.
